CONDITION AND GUARANTEE OF SALE

You have been provided with a complete vaccination and worming medical record of your puppy. Please take it to your vet when your puppy goes for his/her first check up, usually within one week of purchase or sooner. While opinions of vets may vary, and certain geographic locations require different immunization programs, it is generally recommended that puppies receive booster shots every 2-3 weeks until age 4 months for maximum disease prevention. Please check the date on your vaccination record and have your booster shots given at the proper time. Our puppy usually has had a vaccination within for 4-5 days of client taking their puppy home. *DO NOT VACCINATE YOUR DOG WITHIN 3 WEEKS FROM THE LAST DATED VACCINATION IN THE HEALTH BOOKLET OR YOU WILL VOID YOUR CONTRACT* _____ . *LEPTOSPIROSIS SHOULD NOT BE GIVEN BEFORE 6 MONTHS OF AGE* _____ . Havanese have sensitivity to this vaccination.

Your new puppy should be wormed regularly. Internal parasites, worms, caused by coccidia, and giardia, are major problems in stool for young puppies. Even though your puppy has been wormed several times before you purchased it, they still need to be wormed regularly to kill the larva that remains in your pups system. *YOU MUST BRING A STOOL SAMPLE ON YOUR FIRST VET VISIT WITHIN 1 WEEK AFTER YOU RECEIVE THE PUPPY*_____.

Adult dogs develop immunity to many of these parasites, but young pups need frequent worming to protect them as they develop. It is the responsibility of the buyer to continue the health program this pup has been started on.

OTHERWISE THIS GUARANTEE IS VOIDED.
